

## Certificate Program

# Business Processes & Technology

This module is where business and IT meet.

- Business process management: Knowledge and understanding in the field of business processes and the role of technology.
- Modeling business processes, underlying criteria, and opportunities.
- Business processes and their role in building the success of firms and institutions.
- Business processes: Risk management, decision making and successful control and change.
- Developments in Information Technology (IT) and their implications for organizations.
- The role of IT in modern business and competition: Enhancing and promoting investment decisions for future technologies.

The course is offered in the framework of the Executive MBA in Business & IT.
